INSPIRE YOURSELF

WITH HANSA SHOWER SOLUTIONS

DISCOVER YOUR **NEW** SELF – WITH REAL SHOWER PLEASURE.

Showering is so much more than just a daily care ritual. Taking a shower ensures that we can finally become ourselves again. We feel the water – warming or cooling, stimulating or soothing. Our bodies become light, our heads clear, our souls spread their wings. Whilst fatigue and tension drain away, we feel new strength within us: relaxing, refreshing, invigorating – depending on how we choose our shower bath. In these moments – which belong to us and us alone – we find ourselves. We rediscover ourselves. This is the inspiration that we desire. With HANSA's new shower solutions, you can experience and enjoy this inspiration each and every day.

HANSABASICJET

HANSACLASSICJET

Making showering a real pleasure: that is the promise of the two new hand shower families HANSABASICJET and HANSACLASSICJET and the accompanying shower rail sets.

Combined with a thermostat, such as the new HANSA-MICRA for the shower and bathtub, they guarantee maximum comfort.

Put your trust in our quality products – developed and manufactured in-house.

A SMART COMBINATION: SHOWER RAIL SETS

The perfect combination for all requirements (from left to right):

- HANSABASICJET 650mm shower rail set as an entry-level model.
- The flexible shower rail sets, which can be adjusted up to 720mm or 920mm, with a transparent tray – ideal for renovations with a focus on comfort.
- The HANSACLASSICJET shower rail set with a handgrip for improved safety in cross-generational bathrooms.

Consumes up to 50% less water and energy (compared to a conventional two-handle mixer) thanks to individually adjustable water saving functions.

Our thermostats offer maximum safety with protection against scalding.

THERMO COOL. Improved safety as the housing of the fittings conducts minimal heat.

Particularly silent. Fitting complies with the strict conditions under noise protection class 1.

Quick and easy to clean.

Classic – needle spray, even, fine streams of water.

Active – needle spray, powerful, precise streams of water.

Soft – soft, full streams of water.

At least one product of this range has the indicated characteristics

Perfectly tailored to the HANSABASICJET and HANSACLASSICJET hand showers, the new rail sets offer a diverse selection – and the exact solution that you require. The entry-level model comes in a fixed size with fixed wall brackets. The comfort model has flexible wall brackets. These can be moved to the height of already existing drill holes, for example as part of a renovation project. The HANSACLASSICJET model with an additional handgrip for improved safety is perfect for cross-generational bathrooms. Though the variants are very different, they all impress with their functional details. For example, the shower slider can be precisely adjusted to a certain height at the touch of a button – even when the user has wet, soapy hands. And the generously-sized soap tray – with its high edges – is not only extremely practical, but also looks attractive.

DISCOVER YOUR YOUNG SELF: HANSABASICJET HAND SHOWERS

The light-gray shower head base surrounded by the housing is top-quality, looks modern and is light and elegant.

Anti-lime technology
Flexible silicon nozzles ensure lime does not stand a chance.

The **THERMO COOL funktion** ensures that the outer shower housing conducts minimal heat.

The new HANSABASICJET family includes two fresh and young hand shower models, which may be combined with all modern fitting ranges. The design – straight and clearly geometrical, yet with quite soft edges and smooth transitions – corresponds exactly to contemporary aesthetic tastes. With a diameter of 95mm, the shower head is relatively large, but still extremely easy to handle. The purists will go for the single-stream variant; if you like variation from time-to-time, the three-stream model is for you. The type of water stream can be easily adjusted – with just one hand – by means of an organically integrated diverter.

The three-stream variant allows you to switch easily between the stream types Relaxation, Refreshment and EcoFlow with limits on the amount of water consumed.

DISCOVER YOUR VITAL SELF: HANSACLASSICJET HAND SHOWERS

The new HANSACLASSICJET truly has its own unique personality. The conical shape is distinctive and its smooth transition into an oval handle is smart: this ensures that the shower can be securely gripped and does not rotate – even when the user has wet hands. The particularly ergonomic handle as well as the highly contrasting visual appearance with a light chrome housing and a dark shower head base turn HANSACLASSICJET into the perfect hand shower for cross-generational bathrooms. The set with the shower rail, which has an integrated handgrip, is a particularly functional and attractive solutions for vital living.

The **contrast between the dark shower head base and the light chrome housing** is clearly visible – for every generation.

Anti-lime technology
Flexible silicon nozzles ensure lime does not stand a chance.

The **handy diverter** can be easily operated with just one hand.

The **THERMO COOL function** ensures that the outer shower housing conducts minimal heat.

You can also choose between two HANSACLASSICJET variants: single-stream or three-stream (stream types: Relaxation, Refreshment and EcoFlow with limits on the amount of water consumed)

COMFORTABLY COMPLEMENTED: HANSAMICRA THERMOSTATS

Simple and safe operation thanks to integrated ergonomic stop buttons

38°C safety lock to prevent scalding

EcoFlow water limiter; integrated diverter/volume control on the bathtub version

The THERMO COOL function ensures that the outer housing conducts minimal heat.

Chic and enhanced levels of comfort: the HANSAMICRA thermostats for the shower and the bathtub (from top to bottom). To upgrade your bathroom at little cost, you can purchase the shower thermostat in the renovation package together with a HANSABASICJET shower rail set (see left).

HANSAMICRA is a modern and young thermostat concept, which offers above-average functionality for this class of products. With its contemporary and clear design, the shower and bathtub thermostats are perfectly suited to modern requirements – and to the new hand shower families and hand shower sets. HANSAMICRA can be easily tailored to meet your requirements and turns showering into a care-free and safe pleasurable experience – without any readjustments or unpleasant surprises. For noticeably improved comfort that you really won't be able to do without.
